HBC and BDT thought our followers might appreciate something upbeat during these heavy times. In 2016 we acquired Chisenupuri, with a promise to one day try to rebuild the lift. Our business plan is based on sustainability so the first step is trying out a cost effective lift option. It was a very long two weeks of set up and testing and it still needs tweaking to say the least but we plan to be running a rope tow every year from March 7th until the end of the season. The lift tickets will be cheap, the park(s) will be lit and we will also be offering a cheap one time ride up to get you a kickstart into the backcountry. We are feeling very lucky to be where we are whilst this whole thing calms down. We sure hope to see you next season but we would be happier to keep people safe so let's all do the right thing. The covid virus is nothing to take lightly, please participate in physical distancing, for everyone's health.

Oh yeah, and it's snowing! It looks like the elusive Japril will be with us all week!
